Foreword

The year 2016-2018 marked the expansion of the phased development framework for WaSH development in Mindanao, Visayas and Luzon. It also ushered the strengthening of capacities of local organizations for humanitarian response.

2016 saw the consolidation of WaSH development started in Capiz. This year also marked a relatively calm period in the front of emergency response. The Humanitarian Response Consortium used this period to develop and capacitate the staff of its member-organizations for a more efficient and organized emergency preparedness and response activities.

Year 2017 ushered the expansion of the PhATSS program in other municipalities of Capiz, Sultan Kudarat in central Mindanao and Puerto Princesa City in Palawan. A move towards strengthening and nationalizing the PhATSS development framework started this year, supported by UNICEF in collaboration with the DOH and other national agencies and development organizations involved in WaSH development. This year also brought massive displacement of people in Marawi City when terrorist group invaded it. This resulted to massive devastation of the city and exodus to neighboring provinces. Aside from this man-made calamity, this year also brought 2 devastating typhoons towards the end of the year, which ravaged the provinces of Biliran, part of Lanao Del Sur (which is already severely affected by the Marawi siege), and Palawan in its southernmost tip.

Continuing support to WaSH response in affected populations of Lanao Del Sur continued on in 2018. PhATSS implementation and expansion also continued especially in Mindanao and the Visayas. Moreover, water infrastructure projects were also implemented in New Bataan in Compostela Valley, several municipalities in Capiz, Bukidnon and Negros Occidental.

ASDSW/SDCS continue to live up to its vision of “Empowered communities taking responsibility to improve their quality of life and manage their resources and capacities” with the continued trust of partner communities and donors.

Message from the Executive Director

ASDSW turned 10 years old in 2016. As we move into the second decade of operation, the development industry faces several challenges. The rise of populism worldwide has significantly affected the international funding picture for development and response, while governance and civil society are under increasing pressure and restrictions when it comes to human rights, dealing with climate change and where truth and facts are no longer a true basis for dialogue.

Within this environment, the remarkable staff of SDCS and ASDSW remain committed to working with communities and local government to improve access to Water and Sanitation Services. As part of an expanded Humanitarian Response Consortium, it continues to provide high quality effective response services to those impacted by disaster. For 2 years, our team based in Iligan City have been supplying relief services to impacted communities while working with LGUs in developing recovery plans and structures for WaSH in Lanao Del Sur. There is a hunger for our services in this area and as an organization we are committing to continue this work to not only improve the lives in these communities but to assist the Bangsamoro government to become a quality duty bearer as it goes through the transition process.

Our emphasis over the last 3 years has been the development of the phased approach to sustainable sanitation and certification of Zero Open Defecation barangays. Throughout the country from Cagayan Valley to Puerto Princesa, Sultan Kudarat, Lanao Del Sur, LGUs with capacity built by our staff are moving to open defecation free status and investing more heavily in sanitation. The national government is in the process of rationalizing its policy with assistance from UNICEF and ASDSW-SDCS in the process.

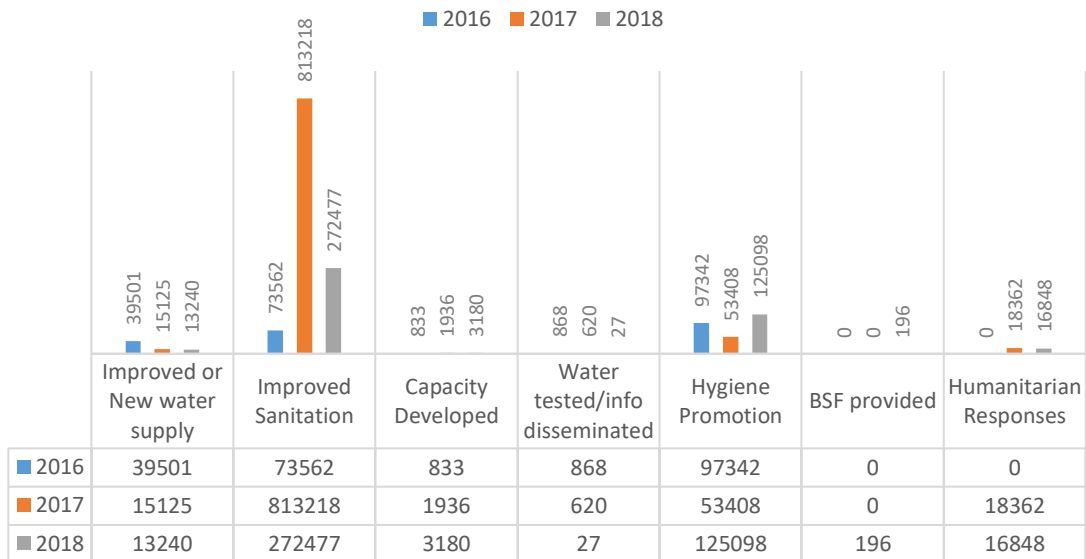

The Humanitarian Response Consortium has expanded from three to twelve organizations. It now has an increased potential in delivering humanitarian services. This large expansion has been coupled with extensive advocacy on local humanitarian leadership at national and international level.

ASDSW, now certified by DSWD will continue to improve its business support systems, with continual improvement of its financial management and human resources systems. This further improves our move for diversification of its funding towards more localized funding.

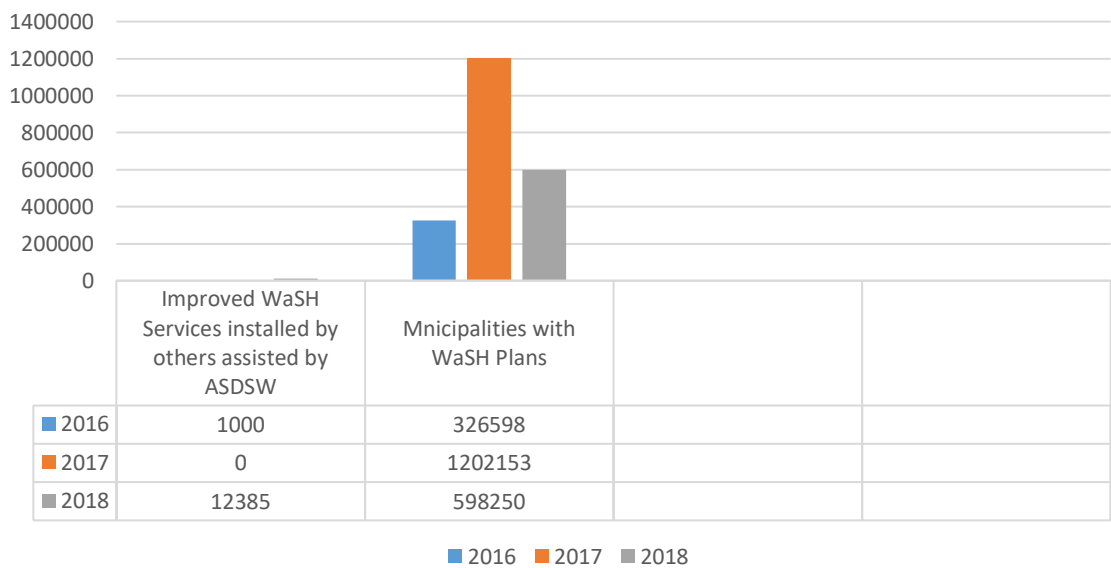

Finally, as we move further into our 2nd decade of change making, our senior and management staff along with the boards are committing to strategic succession planning as we start to move responsibilities and competencies to the new generation of change makers. The future of ASDSW-SDCS will always be challenging but the possibilities will always remain endless as we continue to evolve and adapt.

Impacts

DIRECT IMPACT

Indirect Impact

Stories from the Field

A Healthier Place to Live

Sitti Namrah Sonza

In the province of Sultan Kudarat, town of Esperanza, there is a young boy named Esmael. He lived in a community where most families do not have decent access to toilets. They defecate instead in the so-called longest sewage bank in Sultan Kudarat – the Ala River. Due to poverty, the people in the barangay have not had a proper toilet especially the children like Esmael who always wished to have one.

One day, a group of health workers from DOH, together with a Sanitary Inspector and Municipal Health Officer visited Barangay Ala. The people in the barangay were very happy with the visit and warmly welcomed the visitors, but the people from purok Islam where Esmael is living were afraid and ashamed because of their poor sanitation and hygiene practices. As the team walked around the barangay, one thing struck their mind - this place needs help! Open defecation is readily noticeable. Realizing that most houses in the area do not have toilets propelled the team to find ways to improve the situation and effect sustainable measures to manage wastes and water in Ala River.

The Phased Approach to Sustainable Sanitation (PHATSS) program was introduced, aiming for toilets in every household. The team conducted an orientation in the barangay about the program. The team helped the community identify their goals and assisted them in finding the means to achieve them, in a way, empowering the community in problem solving process. This also helped them organize and plan their activities, encourage positive interpersonal relationships within their community, with the technical support from MLGU BLGUs and NGO. Barangay Ala accepted the challenge of behavior change and community mobilization. The people were empowered to build their own sanitary toilet.

As weeks moved to months, the program progressed slowly but positively. People in the community started to build hygienic toilets. The community also started to improve cleanliness of their surroundings. Thus, the composite team headed by Municipal Health Officer, the Sanitary Inspector, facilitators from A Single Drop for Safe Water (ASDSW), DOH, and LGUs helped promote and achieve a cleaner and healthier place to live in for children like Esmael. Moreover, PHATSS achieved its most important goal; to change the behavior of the people in the community towards proper sanitation and hygiene. The place is now a healthier environment, open defecation is now a thing of the past, and the old Ala River no longer a sewage bank but a scenic viewing place like a boulevard with fresh air and a place for picnics.

Sonia Corpuz: A champion for her community's fight for the right to safe water

Erika Era Ybas - Alim

On December 3, 2012, typhoon Bopha struck the Southern Philippines island of Mindanao, making landfall in Davao Oriental and crossing Compostela Valley killing hundreds in the town of New Bataan destroying homes, livelihoods and forever changing the landscape.

Among those who survived is **Ms. Sonia Corpuz**, a WOMAN, a MOTHER and a real-life FIGHTER. At the age of 58, she became the Chairman of the Board of Trustees of San Roque Rural Water and Sanitation Association (SANRUWASA) for more than a year while

the organization is at its startup period. She is now currently holding a public position as Barangay Kagawad and a fierce advocate for Water, Sanitation and Hygiene (WASH) programs. She courageously withstands trials and accepts the challenges and problems of the Association, along with her own personal struggles to rebuild her life post-Bopha.

Months after typhoon Bopha struck New Bataan, Sonia, together with the rest of the survivors started rebuilding their lives that were shattered by one of the strongest typhoons on record. This life-changing experience opened opportunities for her to explore the things that she previously doesn't even think she can do. She fought for the community's rights to have access to safe water, where her constituents will no longer be afraid of getting sick, will no longer have to face danger while fetching water from dubious sources, and will no longer spend so much time queuing just to satisfy their need for water.

Photo of Ms. Sonia A. Corpuz

Before the typhoon hit the village, Water, Sanitation and Hygiene (WASH)-related morbidity cases were already recorded, a problem that worsened after the typhoon due to limited access to safe water. This issue was brought to LGU attention as major health concern during that time and it paved the way for other agencies and organizations to intervene and provide basic WASH services. The Local Government Unit of New Bataan, in conjunction with other development agencies such as A Single for Safe Water (ASDSW) and other community leaders like Sonia, started to collaborate and develop a water system project for one of the relocation sites for the displaced and affected population.

The Latter-Day Saint Charities (LDSC), reached out by ASDSW pledged to finance the construction

materials and capacity development for a water system. Sonia, along with her other colleagues committed to actively participate in this endeavor. The journey to success however was a struggle. There were many challenges right at the beginning, but it made her realize that nothing good will happen if nobody would take the courage and face up to the challenges. As the chairperson of the

Board of Trustees, she led and motivated her colleagues to serve for a selfless and noble cause and make a difference.

SANRUWASA Officers and BOT members (Standing) from left: Roberto S. Bruse, Sonia A. Corpuz, Francisco A. Ybañez, Meguila S. Ocampo and Junie R. Tulang (Sitting) from left: Manager Vencio M. Bautista Jr and BOT Chairman Jose M. Amodia

In spite of political infighting within the association, she never lost hope that the association will become great as other associations she knew of. She fought for unity

and sustainability. They, as group hurdled the challenges, milestone after milestone and brought the association to a status of established and operational as it is today.

To date, a level III water system was completed, with a capacity to serve more than 2,000 households. They are now already proposing for expansion aiming to serve more people. Currently, more than 1,000 households are served by the system. More and more of her constituents are now enjoying access to safe water at the household level. Furthermore, the Association is now starting to build up resources and slowly becoming self-sustaining.

For now, as member-officer of the SANRUWASA, she sees that their biggest challenge still remains uniting all stakeholders, letting them know and realize that the system is owned not by a single person, not by the LDSC or ASDSW rather by the whole community. The success of the association is a success for all and benefits everybody. Thus, it requires everyone's commitment to maintain, sustain and further develop it for the greater good of the community.

Lanao Del Sur: The Land of Promise

Annie C. Pascual

Working with ASDSW opens one's mind to a real world out there.

I remember the first months I have worked with Single Drop. I have not been to any place in Mindanao back then. Like most people from Luzon or the Visayas, we always think of Mindanao as a scary place, where kidnapping, armed conflict and rido is everyday occurrence, a normal thing. It was also the time when the NGOs were at the limelight in mainstream media due to the Janet Lim Napoles exposé. Guess what, my first assignment was in Mindanao, in Davao Oriental. So naturally, upon hearing this, my relatives were alarmed. "Why are you going to Mindanao? What are going to do there? What NGO is it you're working for? Isn't it dangerous in Mindanao?"

Now, 6 years after, Mindanao is just same place as anywhere else in the Philippines. However, when my family learned that I would be working in Lanao Del Sur, it's as if my first months in ASDSW was resurrected. "Why are you going to Lanao Del Sur? What if you encounter some Maute there?" Ahh, the usual worry of my parents (Not my husband, not my children but my parents). Ha ha!

So off to Iligan City I went, our field team is based there. Every day, we would go to Lanao Del Sur because that's where the work is. Believe me, there are lots of biases and stereotypes we hear of Lanao Del Sur and the Maranaos. I just kept my eyes and mind open. We would work with the partner LGUs: officials and community members alike. We work hand in hand with them in their WaSH and ZOD planning and

programming, visit the barangays, talk to people, learn the local culture, the language, what motivates them, learn how they work with partners and government, how they relate with other communities outside of their province, and so much more.

At the end of my six-month immersion, this is what I realized. Lanao Del Sur is in need of people who cares, people who would guide and motivate them to pursue long-term development, people who would understand that their faith is an innate part of who they are. For so long, they were somehow isolated due to biases and stereotypes thrown their way, and so may also affected how they respond to other peoples group. While admittedly, there are also behavior change that is needed to usher in relevant development in governance, still, these are good people, Filipinos that also need the support and compassion of the government. After the Marawi siege, these people are now more open to new ideas, appreciative of the government and basically wanting of real change and development in their communities.

I remember one incident in particular. We were at barangay Udalo and Olango in Piagapo. We were doing WaSH inventory and focus group discussion there. We stayed there until lunchtime as the barangays were far from Poblacion, the roads are difficult and quite isolated. When lunchtime came, the Punong Barangay invited us to have lunch with them- so, we joined them and had lunch with them. My heart broke (well, almost) when after lunch, the Punong Barangay said that it was the first time that outsiders came and ate with them. In the past, they always invite visitors to lunch, but these were always declined. It's heartwarming to note that they appreciated our acceptance of their invitation without so much a fuss, but at the same time sad that the cultural biases have been so ingrained in the interaction with "outsiders".

Today I say, let us do away with isolationist mindset, the biases, and the stereotypes. Let us start treating people equally, Filipinos like the rest of us, with aspirations, with their own unique culture but people just the same. Lanao Del Sur is in the brink of change, open to new ideas and desirous of development but respecting of their culture and aspirations. Let's usher in a progressive Maranaos, Lanao Del Sur and a progressive Philippines.
